TESTIMONIES

**Nadia, Russia**

**Ibrahim, Sudan**

The "Dissonanze In Accordo" performance is a path through the overcome of a conflict. With Rondine Music Ensemble, formed also from young artists coming from war zones, Rondine students introduce their real testimonies on how they are living the Rondine experience. While the music ensemble is performing a musical repertoire with a strong connection to the last century events, the young witnesses explain how an enemy can turn into a friend.

Rondine Cittadella della Pace works since 1997 in the field of conflict resolution and multicultural and inter religious dialogue. The association is based in Rondine, a small medieval village on Arno's river, in Tuscany countryside. Here, in this International Hall of Residence, Rondine hosts 30 young students from over 25 different nations, cultures and religions coming from different conflict areas. Every year they have an experience of academic studies and cohabitation, supported by an intense and innovative training program about dialogue and pacific coexistence. The students of Rondine are between 19 and 26 years old, selected in war areas or post-war areas like Balkans, Middle East, USA, East Europe, Caucasus and Indian sub continent. At the end of their training in Rondine, students come back in their home country and, through their careers, take part to create a reconciliation and peaceful process. Thanks to the experience of over 18 years of activity, Rondine has promoted exchange programs and cultural events of an unique value, on both national and international level, focused on assert a new culture of dialogue.
